MOVIMENTAÇÃO DE EMBALAGEM

Projetamos e desenvolvemos equipamentos de movimentação sob medida para linhas de embalagens final. Podem ser desenvolvidas esteiras retas, curvas e elevadas. São soluções de movimentação com roletes livres, roletes tracionados lona, esteiras giratórias, alinhadoras e outras, onde são considerados a agilidade, ergonomia no processo e facilitam o deslocamento.

A esteira transportadora é elaborada de acordo com as necessidades de cada indústria e do espaço que irá ocupar. Por isso, pode ser feita de roletes, lonas ou placas, ser reta ou com curvas, tracionada ou não, possuir cantos, rodas para ser transportada ou reposicionada em novo local, quadro de comando, inversor de frequência e muito mais. Tudo isso para estar de acordo com a configuração de cada indústria.
